

SUMMARY

Automation & Workflow Developer with hands-on experience designing efficient automation pipelines, workflow orchestration, and AI-assisted systems. Skilled in n8n, Zapier, API integrations, and webhooks. Developed an ML-powered Instagram fake profile detection system and AI-driven lead qualification automation. Passionate about streamlining processes, reducing manual effort, and improving operational efficiency.

TECHNICAL SKILLS

- Automation Tools: n8n, Zapier, Webhooks, API Orchestration
- Scripting & Programming: Python (for automation & data handling), JavaScript
- Data & Backend: Flask, MySQL, MongoDB
- Workflow & Integration: AI classification, Google Sheets automation, real-time data pipelines
- Tools: Git, GitHub, Vercel

LANGUAGES

- English – Professional Proficiency
- Urdu – Native.

CERTIFICATIONS

- Introduction to DevOps (Coursera – IBM)

PROFESSIONAL EXPERIENCE

Workflow Developer (Prime-integrate | Dec 2025 – Present)

- Designed and implemented automation pipelines using n8n with webhooks, API calls, and conditional logic.
- Built AI-driven automation workflows reducing manual work by up to 70%.
- Developed end-to-end workflow automation for social media, lead qualification, and reporting systems.
- Shared workflow demos and automation insights publicly, increasing technical visibility.

EDUCATION

Bachelor of Science in Software Engineering

Arid Agriculture University, Rawalpindi | 2021 – 2025 | CGPA: 3.74

ACADEMIC PROJECTS

PROJECTS AI-Driven Lead Qualification Automation (n8n)

- Built an automation pipeline combining AI classification, webhooks, and Google Sheets.
- Reduced manual lead processing and streamlined data handling by ~70%.

InstaGuard – Fake Instagram Profile Detection System (Automation Aspect)

- Implemented real-time data extraction using Instaloader, Selenium, and Playwright.
- Automated profile evaluation with ML models (Random Forest & XGBoost).
- Integrated workflow for detection alerts and data storage in MongoDB.
- Link: viberank.dev/apps/InstaGuard

AI-Powered Lead Scoring & Capture Automation (n8n)

- Automated lead capture, classification, and scoring using webhooks and workflow logic.
- Integrated data from multiple sources to streamline lead intake processes.

Support Ticket Intake & Priority Routing (n8n)

- Automated ticket intake and priority assignment using logical branching.
- Reduced manual workload for support teams and improved response efficiency.
